

## Letter of Recommendation

Norway, 18.11.2020

Dear Sirs or Madam,

It is with great pleasure that I have the opportunity to recommend Basetek Limited. Basetek has been supplying BW Offshore since 2012 with mechanical, electrical engineering equipment and spares, personal protective equipment, medical and chemical supplies.

Basetek Limited have a solid understanding of our company requirements and fundamental principles of purchasing which has been developed supplying our affiliates such as: Brazil, Norway, Angola, Brazil, USA, Norway, Singapore, Ivory Coast, Nigeria, Gabon and Mauritania. Basetek have also supplied projects such as Berge Helene, Pioneer, Polvo, Cidade de Sao Vincente, Sendje Berge and Espoir Ivoirien.

We are regularly impressed with Basetek's customer service, attention to detail, competitiveness and delivery performance. Basetek has a very strong technical background with many of their staff being engineers, therefore, they have great understanding of the factory original equipment we are purchasing. Basetek will also go the extra mile and offer alternative of the same specification in view of costs and lead time reductions.

We also have a Global Framework Agreement in place with Basetek Limited which consists of a price book, fixed mark up and rebate structure, this is used by multiple affiliates throughout BW Offshore.

We are extremely satisfied with the way they conduct their business and hope that you have the same pleasant experience with them.

Yours sincerely,

*Kai Erik Karlson*

Kai Erik Karlson
