

MASTCLIMBERS™ BY BRANDSAFWAY

SAFE | FAST | RELIABLE

MASTCLIMBERS
BY BRANDSAFWAY

Why use MASTCLIMBERS™?

Versatile, efficient, safe & environmentally-friendly BrandSafway Mast Climbing Work Platforms (MASTCLIMBERS™) are an innovative and efficient piece of construction equipment used to provide safe work at height access.

Quicker to install and with a lower carbon footprint than scaffolding, BrandSafway turnkey MASTCLIMBERS™ allow personnel, tools and materials to be quickly and safely transported to the ideal working level. And all whilst creating minimal obstruction above or below the platform – leaving the building face clear for other operations for our construction clients.

Utilising fewer components and also requiring less labour and transport logistics, MASTCLIMBERS™ offer a very eco-friendly access method – making them the ideal choice for sustainability focused contractors attempting to achieve net zero.

IPAF training operatives to install our safe, simple MASTCLIMBERS™ is a quick, straight forward process – requiring a relatively low time/cost business impact on skills development and quicker results.

Our extremely high load capacity MASTCLIMBERS™ allow for varying height, with no need for hop ups – meaning platform levels can quickly and safely be adjusted to the desired elevation for any temporary works.

Simply assembled from standard deck and mast modules, they can be erected in a wide range of configurations to suit straight, profiled and even curved building faces. And this work puts less manual handling strain on the installation operatives, thanks to its light-weight, easy-to-install construction.

Furthermore, when construction workers are on-site utilising MASTCLIMBERS™ for access – as high up as 300m – there's considerably lower risk of dropped materials, thanks to the design of the spacious, stable, fully encapsulated working platform.

These reliable units are especially ef-

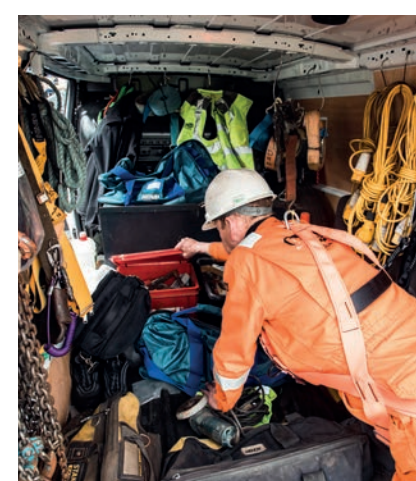

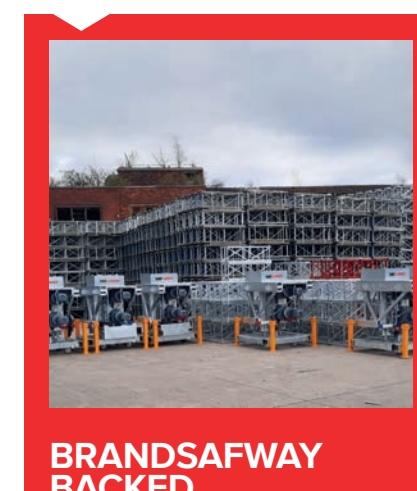

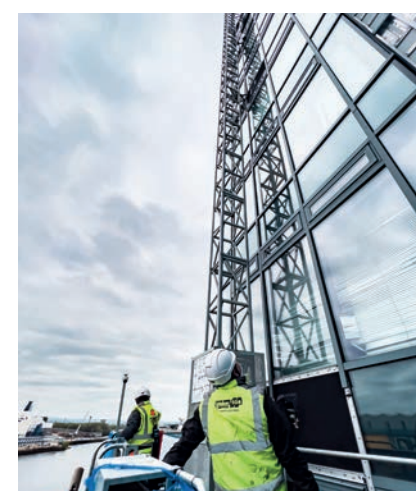

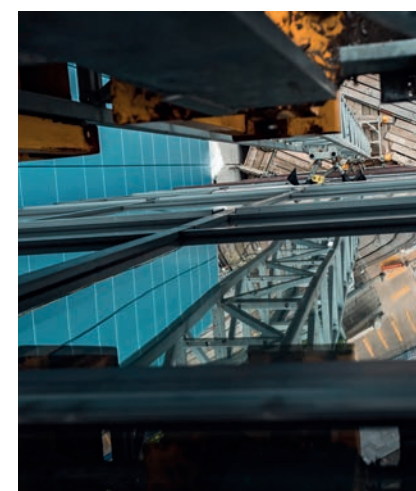

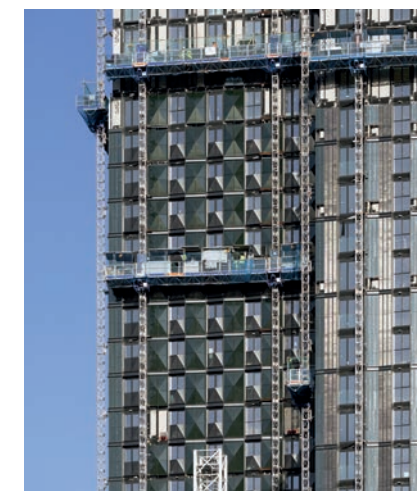

fective on high-rise buildings – for works such as re-cladding – but they can also be a highly efficient access solutions on medium and low-rise projects too.

There's also the boost in productivity to consider: On a 40m elevation job, a scaffold erection might require eight operatives, four wagons and take weeks to install. A MASTCLIMBERS™ project would take just two operatives, one wagon and only three days.

We offer part theory, part practical familiarisation training sessions with various training modules – demonstrator, user, installer & advanced installer – on a one day course, to enable safe and successful usage on-site. And with backing from our Lyndon SGB/BrandSafway in-house bespoke design and engineering department, there's plenty of reasons to consider utilising MASTCLIMBERS™ for access.

Quick to install | Safe to use

BRANDSAFWAY BACKED

Lyndon SGB scaffolding, Taylor's Hoists and BrandSafway MASTCLIMBERS™ vertical access solutions in the UK are backed by the might of one of the world's leading global access providers, BrandSafway.

Our services are interchangeable – offering what we call 'hybrid access solutions' for our clients, making us a desirable one-stop-shop for vertical access and scaffolding solutions, all with in-house design.

Nationwide access coverage.

With MASTCLIMBERS™ by BrandSafway operations based out of Manchester and Glasgow, we have the whole of the United Kingdom covered for vertical mechanical access solutions.

Working in all sectors of construction, right across in the UK – from building façades and bridges, to dams and high-rise buildings (and all to the required British Standards) – our team of top MASTCLIMBERS™ operatives and support staff can meet the access needs of our contractor clients.

Our customers want to know what specific configurations are available and what the achievable capacities are. The MASTCLIMBERS™ by BrandSafway team work together with the client to find the perfect, bespoke solution.

Need a beam on top of a mast section with a winch attached to lift up cladding panels to the required level and then take operatives up to that level? No problems...

Need to work around the corners of buildings, without the need for another face of platforms? No problems...

Our platforms can be fitted with returns that can reach around the edge/corner of a building to work entirely safely on.

They can also be used on uneven terrain, making them a popular choice for construction projects that are located in challenging environments.

And of course one of the primary benefits of using MASTCLIMBERS™ is the high level of safety they offer.

Our MASTCLIMBERS™ are equipped with safety features such as guardrails, safety locks, and emergency stop buttons, which help to prevent accidents and injuries on construction sites. The platforms are also designed to be spacious and stable, providing workers with a secure and comfortable working environment.

Safety, versatility and productivity – available nationwide. The ideal solution.

MULTIPLE DESIGNS

Our modular design provides a huge variety of configurations for our clients – allowing working crews to be positioned with their tools and materials at the optimum access point for the required working surface.

- Single or double mast platforms up to 30m long.
- Masts up to 300m high.
- Platform extensions up to 3m to accommodate irregular elevation profiles/corner sections.
- Load capacity up to 5 tonnes.
- Corner platforms and extension accessories.
- Up to three platforms on the same masts.

And all mechanical access is backed up by the Lyndon SGB/BrandSafway SHEQ safety and in-house design and engineering departments.

Versatile | Capable of 300m | Design included

MASTCLIMBERS™ fleet services.

The MASTCLIMBERS™ by BrandSafway fleet is the best in the business – utilising the best machines from the premier manufacturers, Alimak, SAE and RESA. And our mechanical access services are backed-up by a talented team – creating a slick, safe and simple service for our nationwide client base.

EFFICIENT & ECO-FRIENDLY

In addition to their reliability, versatility and safety, MASTCLIMBERS™ are very efficient.

Quick and easy to set up, our MASTCLIMBERS™ allow clients to start working on the project faster – boosting productivity.

MASTCLIMBERS™ are designed to be highly productive – allowing workers to move quickly between different levels of a construction site without having to climb up and down ladders or scaffolding.

Then there's the environmental, eco-friendly benefits: less transport carbon emissions to move and set up and a lower carbon footprint of the project itself, thanks to fewer operatives on-site and their associated journeys.

And our MASTCLIMBERS™ use less energy than other types of construction equipment, and produce less noise and air pollution – making them an ideal choice for construction projects that are located in urban or environmentally sensitive locations.

From the quality of the preparation of our fleet by our in-house engineers and workshop team, to the quick and safe installation by our IPAF-trained and fully qualified field operations team, to the meticulous service, inspections and examinations by our experienced field operations team – no stone goes unturned to make MASTCLIMBERS™ by BrandSafway one of the best in the business.

Fully British Standards compliant Alimak MC450, Alimak MCM, SAE P40 and RESA 15.36 machines are supplied directly from the manufacturers, as per EN 1495 requirements.

And the latest Health and Safety Executive (HSE) safety bulletins, weekly inspections, periodic service and inspections/six monthly thorough examinations are followed and carried out to the letter (with proof test loads) by our team of temporary works supervisors and co-ordinators.

All of this work within the busy MASTCLIMBERS™ division is done under the watchful eye of our award-winning, highly experienced by BrandSafway/ Lyndon SGB SHEQ safety divisions.

Speaking about the MASTCLIMBERS™ division, Lyndon SGB SHEQ Director, Mark Collinson said: "Safety across all of our working at height divisions is of paramount importance to us all at Lyndon SGB and across the global BrandSafway group – where our 'five pillars of safety' mantra is our gospel: Employee Intervention. Supervisor Observation. Management Safety Reviews. GoldLink Audit System and Learning Network.

"Our dedication to safety starts at the top with our executive leadership team and cascades right the way throughout the staff in our organisation to include our entire network of branches, locations and projects.

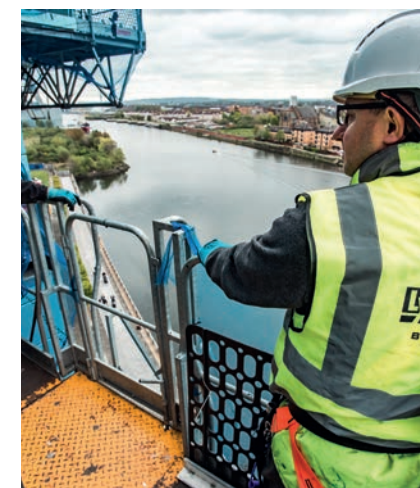

"We are fully committed to a safety culture where we look out for each other and where everyone feels safe, protected and comfortable stopping any task at any time to ensure the safety of all.

"Ownership, personal responsibility and the importance of following our stringent policies and procedures are consistently communicated across our company.

"And we work hard to empower our employees to have a personal responsibility for safety – not only for themselves, but also for their fellow co-workers, customers and contractors – on each and every contract."

Hiring us to provide safe vertical access to your construction project is a safe, sensible move – not only to make use of the scale and quality of the MASTCLIMBERS™ by BrandSafway operation and its inherent safety, but for a seamless integration with other services within the business.

Match MASTCLIMBERS™ with Lyndon SGB scaffolding, QuikDeck® suspended access, weather protection or Rapid-EPS edge protection – all with in-house engineering – for the ultimate hybrid access solution.
