Environmental Policy Statement

The company recognises the importance of sound environmental practises. The protection of the natural environment that supports the eco systems that underpin life itself will remain at the centre of the company's thinking throughout its operations.

The company will take all reasonable precautions to protect the environment in which it operates. This policy statement is the precursor to a full Environmental Management System that aims to ensure both the sustainability of resources and to mitigate environmental damage and where such damage occurs to take immediate action to remedy the situation.

The company is committed to continual improvement of its environmental performance. The board will provide the resources necessary to meet this obligation.

The company and its employees are aware of the interest and concern for environmental issues expressed by many in society, this concern has led to a comprehensive legal framework within which the company will at all times seek to operate.

The company will seek to meet these objectives by:

- Identifying and evaluating its environmental impacts
- Assessing the significance of such impacts
- Setting operational control targets and objectives
- Ensuring effective monitoring
